

auto_simulator.R: Generates outbreak data (linelist and FASTA files). You can specify the number of outbreaks and other *OOpidemic* input parameters.

auto_practRt.R: Calculates the true R_t from the linelist.

auto_genTime_Incid.R: Calculates generation times and incidence from the linelist.

auto_EpiEstimRt.R: Calculates the EpiEstim R_t .

auto_modify_BST_ESTIM.R: Modifies BEAST's R_t estimates.

auto_downSamp_fixed.R and **auto_downSamp_switch.R:** Used for downsampling.

auto_process_plots.R: Post-processes results and generates plots.

building-intuition.R: Helps build intuition for understanding how DTW works
